

My Learning Log—Dinosaurs

The skills and knowledge that we are learning to help organise our learning

Vocabulary	Definition
Dinosaur	'Terrible lizard'.
Herbivore	An animal that only eats plants, fruits and vegetables.
Carnivore	An animal that only eats meat.
Omnivore	An animal that eats plants and meat.
Predator	An animal that hunts other animals
Prey	An animal that is hunted or killed by other animals for food.
Diet	What an animal eats and drinks.
Extinction	When a complete group of animals dies out.
Habitat	The natural place that something lives. A habitat provides living things with everything they need to survive
Fossil	The remains of dead animals, often found on rocks.
Palaeontologist	A person who studies dinosaurs.

We are learning:

To name different types of dinosaurs

When did dinosaurs live?

Dinosaurs lived on Earth over 200 million years ago. They were part of the **reptile** family and lived for over 160 million years.

They became **extinct** around 65 million years ago. Some **scientists** say that the dinosaurs were killed when an **asteroid** hit Earth and others say they were killed by volcanoes.

Many dinosaurs were huge but some were only the size of a big bird.

Palaeontologists

They look for and explore clues from when dinosaurs were alive. They might look at things that are left behind on Earth from dinosaurs, such as:

Super skills:

Enquire, discuss, explain, explore, classify

What is a dinosaur?

What type of dinosaurs were there?

Who was Mary Anning?
